Introduction form tag and icons

Form: The tag is used to create an HTML form for user input. The element can contain one or more of the following form elements: <input>, <select>, <textarea>, <button>, <output>, <option>, <optgroup>, <label>

CSS Icons: CSS icons are an essential part of modern web design, offering a visual representation of actions, ideas, and objects. CSS icons offer a compelling way to achieve this by seamlessly integrating scalable and customizable icons into your web design. CSS Icons from various libraries can be effortlessly styled and customized with CSS, allowing for alterations in size, color, shadow, and more. These icons serve as intuitive graphical elements, enhancing navigation and conveying specific meanings
